

BOROUGH OF FORT LEE

New Jersey

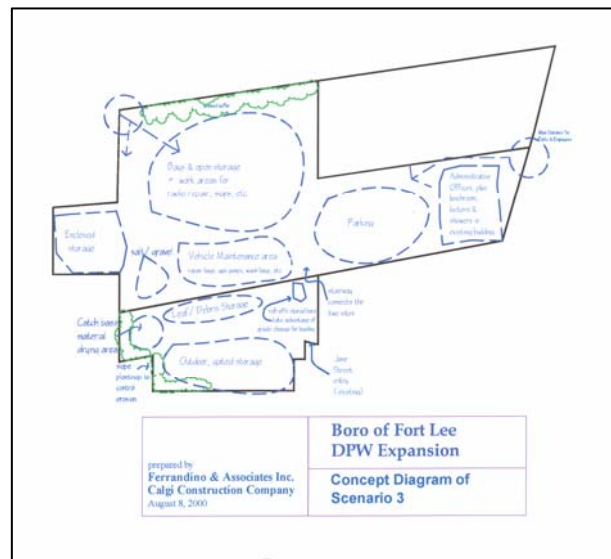

As a first step toward the creation of a physical master plan for the Fort Lee DPW yard, F&A conducted an organizational assessment of the Borough's public works functions, along with other, related municipal functions that may be co-located at the DPW facility. This organizational assessment was combined with a physical evaluation of the yard and a newly acquired, adjacent property. The resulting product was a program and conceptual site plan for the combined parcels.
