

WESTCHESTER, ROCKLAND AND PUTNAM COUNTIES (TRI-COUNTY)

New York

F&A was retained as part of a multi-disciplinary team to prepare a bicycle and pedestrian master plan for Westchester, Rockland and Putnam Counties. The Plan focuses on the creation of a safe and efficient network of bicycle and pedestrian routes to be developed in partnership with various interest groups, property owners and government bodies. The intent was to provide viable choices of alternative transportation modes that are compatible with local, regional and state transportation master plans. The Plan, which included an extensive citizen participation component, has been completed and endorsed by all three counties.
